

To our valued patients and their families,

We hope this message finds you and your family safe and well. Our community has been through a lot over the past few months, and we are all looking forward to resuming our normal habits and routines.

We are excited to announce that we are NOW open can't wait to see all of you again. We are currently **scheduling appointments**.

Our primary concern is the safety of our little patients, their parents, and our staff. We're living in a new world, and must take extra precautions. Infection control has always been a top priority for our practice. And, we have and will follow the strict guidelines of the ADA, CDC, and OSHA to make sure that our patients and staff are safe.

Additionally, we are taking some extra precautions to ensure the safety of our patients and staff:

- We have purchased several medical/hospital grade air purifiers/HEPA filters (IQAir HealthPro Plus) to eliminate airborne particles of all sizes, including viruses.
- We have purchased an FDA approved extraoral suction unit for our treatment rooms with built in UV light that will kill bacteria and viruses and eliminate threats from aerosol contamination.
- We will be allotting extra time between patients to allow for extra cleaning, air circulation, change of PPE, and minimizing the amount of people in the office to allow for social distancing.
- We will be asking patients to check in and wait in their car until it is time for their appointment, and will call/text when ready.
- We will only allow one parent/one patient in the treatment room at any time (unless we are seeing siblings that day).
- If you have a mask, please wear it to your child's appointment. Due to limited supply of PPE to healthcare providers, we will not be able to provide masks for parents.
- You will be asked to use hand sanitizer as soon as you enter the office.
- We have removed magazines/books/small toys from our waiting area, since these items are difficult to clean and disinfect.
- We will communicate with you beforehand to ask some screening questions. You'll be asked the same questions when you come in.
- We will be taking temperatures of our staff members at the beginning of every work day and our patients/parents before each appointment.
- If your child, or anyone in the family, has been sick, or in contact with anyone known to have CoronaVirus within the past 2 weeks, please let us know so we can reschedule your appointment.

We look forward to seeing you again! We are happy to answer any questions you may have about the safety precautions we have taken to keep us all safe and healthy.

To make an appointment, please **call our office at 914-949-6655** or visit our website at [www.milesoflittlesmiles.com](http://www.milesoflittlesmiles.com)

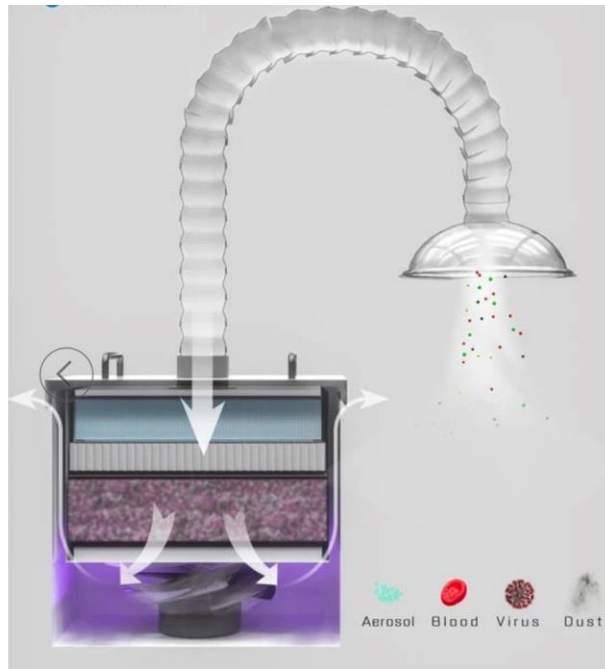

Thank you for being great patients, we value your trust and loyalty and look forward to welcoming you back!

Sincerely,

The Team at Miles of Little Smiles

Dr. Mila, Dr. Dee, Maria, and Stephanie!

## Extraoral Dental Suction System

## IQAir HealthPro Plus

### 1 Micro-particle filtration

Eliminates micro-particles such as pollen, pet dander and mold spores.

### 2 Granular activated carbon adsorption

Eliminates volatile organic compounds (VOC) which are responsible for odors.

### 3 Pelletized chemisorption

Destroys harmful chemicals, such as formaldehyde, by an oxidation process inside a chemically active alumina pellet.

### 4 HyperHEPA filtration

Eliminates bacteria, viruses and combustion particles through a nono-fiber structure.
